Nairobi, Kenya | 0715 190 679 | mainaeric692@gmail.com

Portfolio: https://skipper-blue.github.io/my-portifolio/

Professional Summary

Motivated and detail-oriented third-year Computer Engineering student at Maasai Mara University with strong interests in software engineering, networking, and system integration. Experienced in building full-stack web applications and backend systems using JavaScript, React.js, Node.js, Express.js, and PostgreSQL. Skilled in designing scalable systems, developing REST APIs, integrating external services, and deploying applications using modern cloud platforms such as Vercel and Render. Has practical experience integrating M-Pesa payment systems into billing and management platforms. Recognized for strong problem-solving abilities, teamwork, technical design thinking, and the ability to quickly learn new technologies.

Education

- Maasai Mara University — Bachelor of Science in Computer Engineering (2023 – Present, 3rd Year)
- St. Bonaventure Kaheti Boys High School —KCSE Grade B- (2019 – 2022)
- Mountain Star Academy — KCPE 335 Marks (2018)

Technical Skills

- **Programming Languages:** JavaScript, Python, Java, C++, PHP, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Bootstrap
- **Databases:** PostgreSQL, MySQL, Supabase
- **Tools & Platforms:** Git & GitHub, Visual Studio Code, Postman, Docker (Basic), Vercel, Render
- **Networking & Systems:** Network configuration, system integration, RESTful API development, API integration
- **Design & Architecture:** Web interface design, technical system design, system architecture planning

Projects

Hotel Management System

Tech Stack: Node.js, Express.js, React.js, PostgreSQL, REST APIs

Developed a full-stack hotel management system that allows administrators to manage rooms, bookings, customers, and payments efficiently. Implemented room availability tracking, check-in/check-out workflows, receipt generation, and operational reporting dashboards. Integrated billing features and structured APIs to support external payment services.

Smart Pool System
Tech Stack: JavaScript, Node.js, IoT Integration, PostgreSQL
Built a smart monitoring system designed to track swimming pool conditions and usage patterns. The system integrates sensors and software to monitor water quality, usage statistics, and maintenance alerts to improve operational efficiency and safety.

M-Pesa Billing Integration
Tech Stack: Node.js, REST APIs, Payment Gateway Integration
Implemented M-Pesa payment integration within billing systems using API-based communication. Developed backend logic to handle payment requests, transaction confirmation, and automated billing updates. This integration allows systems to receive mobile payments securely and update service records in real time.

Work Experience

Technician — Softlife Technologies (2024 – Present)

- Installation and configuration of WiFi networks and routers for homes and businesses
- Troubleshooting connectivity and network performance issues
- Assisting in internet infrastructure setup and maintenance
- Providing technical support, diagnostics, and system maintenance

Certifications & Awards

- JavaScript Intermediate Certificate — Sololearn
- Recognition Medal — ASTEM Center Africa

Professional Skills

- Teamwork and collaboration
- Leadership and initiative
- Strong communication skills
- Problem-solving and analytical thinking
- Technical system design
- Self-management and discipline
